

Net-Centric Warfare

By Vijay Oberoi (Ed.)

KW Publishers, New Delhi, India, 2008. Hardcover. Book Condition: New. Dust Jacket Condition: New. First Edition. Network-Centric Warfare (NCW) originated in the United States wherein a concept of a "system of systems" was first published by the Institute of National Security Studies in 1996. This "system of systems" comprises a network of intelligent sensors, command and control systems and precision weapons that enhances situational awareness, rapid target assessment, and distributed weapon assignment to enable quick decision-making and rapid response. The application of information technology has largely contributed to what is called the Revolution in Military Affairs. Technology has been the driver of change in the art of war. NCW is an offshoot of far-reaching developments that have taken place in the field of information technology. The Indian Army, Navy and Air Force have made considerable strides towards improving command, control, communication, computers, intelligence information, surveillance and reconnaissance (C4I2SR), without which no modern war-fighting machine can conduct operations effectively. Networks will form the heart of future wars. However, achieving network-centricity should not be seen as the aim of warfare but used only as an enabling mechanism towards achieving a quick and decisive victory over the adversary. The Centre for Land Warfare Studies (CLAWS),...

Reviews

Good electronic book and valuable one. It is one of the most incredible publication we have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Mrs. Bridgette Rau MD**

This ebook may be worth getting. I actually have read through and i am sure that i am going to likely to read through again once more down the road. You will not sense monotony at whenever you want of your respective time (that's what catalogues are for relating to should you check with me).
