ADVANCES IN SPACE BIOLOGY AND MEDICINE, VOLUME 4

Elsevier Science. Hardcover. Condition: New. This item is printed on demand. 296 pages. This fourth volume in the series, dedicated entirely to the results of the first European study of the effects of long-term confinement and isolation. The volume continues to attempt to fulfill the aim of this series, to bring the findings and accomplishments in the field of space biology and medicine to a wider group of scientists than merely the relatively small group of biologists and physiologists currently...
