It s the spring of 1877 in Washington, D.C., and at the U.S. Naval Observatory, great changes are afoot: historical, romantic, and scientific. When the brilliant Cynthia May a Civil War widow whose beauty has been shadowed by worry and poverty starts work as a human computer at the Observatory, astronomer Hugh Allison has found just the partner he needs for a radiant, half-crazed scheme which will make him live forever in the annals of science and space. But first the two scientists must overcome the very earthly obstacles presented by powerful Senator Roscoe Conkling of New York; and a fraudulent astrologer who just might know their future.
