

Gene Expression: General and Cell-Type-Specific

Filesize: 6.28 MB

Reviews

An exceptional ebook along with the typeface employed was intriguing to see. It really is simplistic but surprises within the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Brian Miller)

GENE EXPRESSION: GENERAL AND CELL-TYPE-SPECIFIC

To get **Gene Expression: General and Cell-Type-Specific** eBook, remember to follow the link below and download the file or have accessibility to other information which might be highly relevant to GENE EXPRESSION: GENERAL AND CELL-TYPE-SPECIFIC ebook.

Birkhauser, United States, 2012. Paperback. Book Condition: New. Softcover Reprint of the Orig ed.. 235 x 155 mm. Language: English Brand New Book ***** Print on Demand *****.This book is the first volume in a new series Progress in Gene Expression. The control of gene expression is a central-most topic in molecular biology as it deals with the utilization and regulation of gene information. As we see huge efforts mounting all over the developed world to understand the structure and organization of several complex eukaryotic genomes in the form of Gene Projects and Genome Centers, we have to remember that without understanding the basic mechanisms that govern the use of genetic information, much of this effort will not be very productive. Fortunately, however, research during the past seven years on the mechanisms that control gene expression in eukaryotes has been extremely successful in generating a wealth of information on the basic strategies of transcriptional control. (Although regulation of gene expression is exerted at many different levels, much of the emphasis in this series will be on transcriptional control. A future volume, however, will deal with other levels of regulation). The progress in understanding the control of eukaryotic transcription can only be appreciated by realizing that seven years ago we did not know the primary structure of a single sequence specific transcriptional activator, and those whose primary structures were available (e. g., homeo domain proteins) were not yet recognized to function in this capacity.
