Brand New Book ***** Print on Demand *****.Excerpt from *Studies in Zoology: An Introduction to the Study of Animals for Secondary Schools and Academies* This volume is not intended to add anything to the science of Zoology. It is not for the investigator, it is for the beginner. The author has found that laboratory guides are as a rule too dry and conventional to accomplish the best results and he has accordingly attempted to make these directions simple and suggestive as well as comprehensive. The plan of these studies was worked out in the Manual Training High School, Kansas City, Mo., where it was thoroughly tested with students of all grades of the high school. The book has also been tested in two Normal Schools and in several high schools and has been found to warrant the claims made for it. Information about animals comes to the child from three sources, viz.: from a study of the animal itself, from a study of the environment, from reference books and lectures by the teacher. This book emphasizes the first and second of these sources and it is expected that the teacher will see that the third is not neglected. The author has gleaned from so many sources that it would be impossible to acknowledge them all, but he desires to make special mention of the assistance of his associate, Mr. A. N. Young, on the Branch Vermes and on various other parts of the book. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
