# From Lévy-Type Processes to Parabolic SPDEs

Filesize: 5.02 MB

Reviews

Thorough guideline! Its this type of good read. It is really simplistic but shocks from the 50 percent from the publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Sallie Wiegand)

Springer-Verlag Gmbh Jan 2017, 2017. Taschenbuch. Condition: Neu. Neuware - This volume presents the lecture notes of the two courses given by Davar Khoshnevisan and René Schilling, respectively, at the second edition of the Barcelona Summer School on Stochastic Analysis. René Schilling's notes are an expanded version of his course on Lévy and Lévy-type processes. Its purpose is two-fold: on the one hand, it extensively presents some properties of the Lévy processes, mainly as Markov processes, and its different constructions, leading eventually to the celebrated Lévy-Itô decomposition. On the other hand, it identifies the infinitesimal generator of the Lévy process as a pseudo-differential operator whose symbol is the characteristic exponent of the process, allowing to study the properties of Feller processes as space inhomogeneous processes that behave locally like Lévy processes. The presentation is self-contained, and different chapters are enclosed to review Markov processes, operator semigroups, random measures, etc. The course by Davar Khoshnevisan deals with some problems in the field of stochastic partial differential equations of parabolic type. More precisely, the main objective is to establish an Invariance Principle for those equations in a rather general setting, and also deduce, as an application, comparison-type results. The framework in which these problems are addressed go beyond the classical setting, in the sense that the driving noise is assumed to be a multiplicative space-time white noise on a group, and the underlying elliptic operator corresponds to a generator of a Lévy process on that group. This implies that stochastic integration with respect to the above noise, as well as existence and uniqueness of solution for the corresponding equation, become relevant on their own. These aspects are also developed, in parallel with a lot of illustrative examples. This volume presents the lecture notes from two courses given by Davar Khoshnevisan and René...
