Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Warships Associated With World War II in the Pacific: National Historic Landmark Theme Study During the course of this study more than 40 surviving warships and merchantmen dating from World War II were identified and visited. Twenty-five of these were found likely to meet the criteria of the National Historic Landmarks Program and are represented by inventory forms in this study. A twenty-sixth ship, uss Missouri, is written up because it is listed on the National Register of Historic Places, but is not likely to meet the criteria because of substantial changes made to her since listing. These vessels include most of the major types and classes of warships to see service from 1941 to 1945. The theme study is organized by classes because this is the best way to organize and describe the types of ships that saw service in the war. Many of these classes, especially for the destroyers and submarines, represent the development of warship design theory that evolved as a result of the hard lessons learned in battle against the Japanese during the war. Because of this, many of these classes are individually important and represent either an interim or final point in warship design. Included in this study are aircraft carriers, battleships, cruisers, destroyers, submarines, minesweepers, and a number of other types such as Liberty Ships, and PT Boats. One German submarine is included in this theme study for several reasons first, it is the only surviving one of its type anywhere; second, it relates to War in the Pacific in that the German submarine threat had to be defeated in order to shift strategic emphasis to the Pacific theater.
