Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The American Journal of School Hygiene What was then true of schools is still to a very large extent true. Schools are notably institutions for giving a rather narrow type of intellectual memoriter training. Their houses have been erected on small plots of land little larger than is needed for the buildings themselves, and have not taken into consideration the importance of play and outdoor physical education; they have provided one or more classrooms in a building with seats screwed to the floor and arranged for sedentary book reading; they have provided teachers who to a large extent are unlearned in the physiological aspects of children and of education. In many cases, as very recent school health surveys are appallingly illustrating, they have failed to provide in this library-school room even the first elements of adequate sanitation and hygiene.
