## INFERENCE OF REGULATORY INTERACTIONS IN GENETIC SYSTEMS

VDM Verlag Mrz 2009, 2009. Taschenbuch. Condition: Neu. Neuware - The main focus of this thesis is the development of techniques to aid in the process of inferring how genes interact with each other in a living organism. Knowledge of these interactions have implications in gaining an understanding of how cellular processes work, how organisms survive and evolve under different environmental conditions. The techniques are based on an S-system type differential equation model for the process of gene regulation. They...
