By Berthajane Vandegrift

AUTHORHOUSE, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The Freudian view seemed to be that people consist of Ids, ego s and superego s. People are supposedly also inhabited by something called a subconscious, a mysterious entity with a tendency to think naughty thoughts and keep them a secret from one s conscious self. When this naughty subconscious takes over and controls one s actions - without permission - people become neurotic. If the patient lies on a couch and talks, and a psychiatrist listens, the subconscious might be tricked into revealing itself. Once enticed out into the open by a therapist, the subconscious supposedly loses its power to cause neurosis.
