

Breast Cancer

By Jian Cao

Springer-Verlag GmbH Mrz 2016, 2016. Buch. Book Condition: Neu. 261x182x20 mm. Neuware - This volume provides resources, ideas, and bench manuals for the study of breast cancer. This book is divided into five sections: methods used in clinical laboratory for diagnosis (Detection of Molecular Markers of Breast Cancer); methods used in both clinical and research laboratories for testing genetic alterations (Genetic Detection of Breast Cancer) and (Isolation of Breast Cancer Cells); methods used to study the behavior of breast cancer cells (In Vitro Experimental Assays for Breast Cancer); and methods used for mimicking human breast cancer in a living organism (In Vivo Experimental Models for Breast Cancer). Breast Cancer: Methods and Protocols also explores several recently developed techniques for the study of breast cancer progression. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Practical and thorough, Breast Cancer: Methods and Protocols, is a valuable handbook for both graduate and advanced undergraduate students of biological sciences, as well as scientists, technicians, and physicians working in the academic, hospital, or pharmaceutical industry...

Reviews

The book is fantastic and great. It is filled with wisdom and knowledge I am just easily will get a enjoyment of looking at a composed publication.
-- **Bradley Hahn**

It becomes an amazing ebook that we have possibly read through. It is really simplified but surprises within the 50 % from the ebook. You can expect to like how the blogger compose this book.
