Reviews

Definitely one of the best book We have at any time go through. It is actually filled with wisdom and knowledge I am quickly could get a delight of studying a published book.
(Dr. Kim Bergnaum)

JOURNAL OF THE PROCEEDINGS OF THE LINNEAN SOCIETY, VOL. 6: ZOOLOGY (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Journal of the Proceedings of the Linnean Society, Vol. 6: Zoology Caudal segment furnished with twelve spines or setae, eight long and four short; the former being retroverted and disposed in pairs, alternating with the latter, which are somewhat nearer the extremity. In addition to these characters, I may remark that the head appears to be supplied with a complicated buccal apparatus, but the preservative medium has rendered the parts so transparent that I refrain from hazarding a precise description of its several parts. Moreover, in different examples these appearances are dissimilar, whilst the cephalic segment itself is proportionally longer in some cases than in others. The eye-spots are always distinct, more or less elongated, each evidently consisting of two separate pigment-masses, the line of demarcation being clearly defined. In the specimen figured a on the slide, the eyes are much more elongated and more uniform in outline; being, nevertheless, thicker behind than in front. Connected with the eyes and buccal apparatus there are two laterally disposed muscular masses, which almost fill up the longitudinal halves of the cephalic segment. The buccal cavity itself is tolerably well defined, being funnel-shaped and apparently closed behind. The sophagus takes its origin at the upper and back part of the sac, immediately behind a peculiar form of dental apparatus which guards the pharyngeal opening. This structure forcibly reminds one of the gastric teeth found in decapodous Crustaceans, and appears to consist of a central and two lateral horny pieces, which, acting upon one another, serve to comminute the food only partially broken up by the buccal organs. The intestinal canal can be traced throughout the entire series of...
