

Green Taxation in Question: Politics and Economic Efficiency in Environmental Regulation

By C. Daugbjerg

Palgrave Macmillan. Hardcover. Condition: New. 200 pages. Dimensions: 8.6in. x 5.5in. x 0.8in. Environmental economists have in general paid little or no attention to the political context within which green taxation would be introduced. In order to understand the real-life politics of green taxation, it is necessary to establish which political constraints determine the actual design of green taxes. Daugbjerg and Svendsen identify rent-seeking, party politics, and policy networks as the three main constraints in environmental regulation. This analysis forms the basis of policy recommendations on the future design of green taxation and international permit trading. Even though these policy recommendations are second best in strict economic terms, they are the best economic designs given that they must be politically feasible.
