Springer, Netherlands, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Identity has for long been an important concept in philosophy and logic. Plato in his Sophist puts same among those forms which run through all others. The scholastics inherited the idea (and the terminology), classifying same as one of the transcendentals , i.e. as running through all the categories. The work of Locke and Leibniz made the concept a problematic one. But it is rather recently, i.e. since the importance of Frege has been generally recognized, that there has been a keen interest in the notion, formulated by him, of a criterion of identity. This, at first sight harmless as well as useful, has proved to be like a charge of dynamite. The seed had indeed been sown long ago, by Euclid. In Book V of his Elements he first gives a useless definition of a ratio: A ratio is a sort of relation between two magnitudes in respect of muchness . But then, in definition 5 he answers, not the question What is a ratio? but rather What is it for magnitudes to be in the same ratio? and this is the definition that does the work. Softcover reprint of hardcover 1st ed. 1980.
