It describes the core capabilities; roles and responsibilities; and coordinating structures that facilitate the protection of individuals, communities, and the Nation. This Framework is focused on actions to protect against the greatest risks in a manner that allows American interests, aspirations, and way of life to thrive. The Federal Government works collaboratively with local, state, tribal, and territorial governments; the private sector; and nongovernmental organizations (NGOs) to develop and deliver Protection core capabilities. Protection core capabilities are applied in varying degrees to achieve successful implementation of the Protection mission area. The 11 core capabilities described in the National Protection Framework are Planning; Public Information and Warning; Operational Coordination; Access Control and Identity Verification; Cybersecurity; Intelligence and Information Sharing; Interdiction and Disruption; Physical Protective Measures; Risk Management for Protection Programs and Activities; Screening, Search and Detection; and Supply Chain Integrity and Security. The following principles guide the development and support the execution and deployment of Protection core capabilities. These guiding principles are resilience and scalability; risk-informed culture; and shared responsibility.
