## BASIC SYSTEM IDENTIFICATION WITH MATLAB

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 222 pages. Dimensions: 11.0in. x 8.5in. x 0.5in. System Identification Toolbox constructs mathematical models of dynamic systems from measured input-output data. It provides MATLAB functions, Simulink blocks, and an interactive tool for creating and using models of dynamic systems not easily modeled from first principles or specifications. You can use time-domain and frequency-domain input-output data to identify continuous-time and discrete-time transfer functions, process models, and state-space models. The...
