The more the human mind explores infinity, the firmer becomes the conviction of the incomprehensibility of its vastness. The more science reveals of the human personality, the more does even its expanding power demonstrate the insight of the query, What is man that thou art mindful of him The thoughtful mind inevitably speculates on infinity, but generally in wild stretches of the imagination, made seemingly intelligible by some petty human concept. The logical method of progression through the universal, which is within human comprehension, to the infinite, is uncommon.
