Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The North American Review, Vol. 140 The physical problem, proposed independently and almost simultaneously near the beginning of this century by three eminent men of genius, - by Goethe, Geoffroy St. Hilarie, and the elder Darwin, - the question how animals and plants came to have the structures and habits that characterize them as distinct species, which was proposed in place of the teleological question, why they were so produced, has now fairly become a direct question for scientific investigation. There is no longer any doubt that this effect was by some natural process, and was not by a formless creative fiat. Moreover, there scarcely remains any doubt that this natural process connects the living forms of the present with very different forms in the past; and that this connection is properly described in general terms as descent with modification.
