

An Evaluation of the Drop Characteristics and Ground Distribution Patterns of Forest Fire Retardants (Classic Reprint) (Hardback)

By Charles W George

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from An Evaluation of the Drop Characteristics and Ground Distribution Patterns of Forest Fire Retardants A review of the objectives of the study and the variables affecting the ground distribution pattern indicates that the study goals could best be met by using currently formulated fire retardants and a presently used aircraft having a load capacity that is no less than the minimum increment usually dropped. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
