RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 90 pages. LC Number: KF27 . I519 2007e OCLC Number: (OCoLC)212371828 Subject: Geological carbon sequestration -- United States. Excerpt: . . . 9 capacities can be utilized remains unknown. The USGS can create a scientifically based multidisciplinary methodology for geologic carbon dioxide storage assessment that can be consistently applied on a national scale. Changing gears a little bit and talking about terrestrial carbon sequestration, their practices seek to effect the transfer of carbon between the atmosphere and the terrestrial biosphere to reduce atmospheric concentrations. Land management practices in the United States can affect the transfer of carbon from terrestrial systems into the atmosphere or good land stewardship practices can enhance the biological uptake of carbon dioxide from the atmosphere. The knowledge gained on the benefits of terrestrial sequestration will improve our understanding of the duration and extent to which the biological uptake of the atmospheric CO can be enhanced to reduce atmospheric concentrations. There are a number of research efforts that are ongoing in the USGS, and research that is needed include the capabilities of seals to retain carbon dioxide, the role of abandoned wells that...
