

Chemical Processing of Dielectrics, Insulators and Electronic Ceramics: Volume 606 (Hardback)

Filesize: 4.04 MB

Reviews

Completely essential go through book. I actually have go through and i am sure that i am going to going to read yet again yet again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Edwardo Rohan III)

CHEMICAL PROCESSING OF DIELECTRICS, INSULATORS AND ELECTRONIC CERAMICS: VOLUME 606 (HARDBACK)

Materials Research Society, United States, 2000. Hardback. Condition: New. Language: English . Brand New Book. This book focuses on the creative use of chemistry in the fabrication of a variety of oxide and non-oxide materials which are likely to play a crucial role in the development of the next generation of microelectronics devices. It includes inorganic precursor chemistry, gas-phase and solid-state chemistry, materials science, chemical physics and chemical engineering. Highlights include the deposition of high-k dielectric gate oxides, ferroelectric oxide films for infrared and memory applications, low-k dielectrics, TiN and TaN diffusion barriers, and fresh precursors for III-V nitrides. The emphasis is on chemical methods for the controlled deposition of thin films, for which chemical vapor deposition (CVD) has proven to be a useful and versatile technique. Of particular interest is the use of liquid-injection MOCVD for the deposition of oxide multilayers and superlattices. Solution deposition techniques such as sol-gel, metalorganic decomposition (MOD), hydrothermal processing are also prominently featured. Topics include: CVD of oxide ceramics; CVD of nonoxide ceramics; solution deposition of electronic ceramics; alternative chemical processing methods and characterization of electronic ceramics.
