Aquaculture is a great way to get organic foods year round and save yourself a ton of money! Even if you just want to start small, this book has all you need to know about the process that makes aquaponics so ingenious. You do not have to be a commercial farmer to make this method work for you. Many families have small systems in their basements or even a little tank on the window sill. Not only that, this is a great experiment to teach your kids the nitrogen cycle and how plants and fish need certain things to grow. The truth is aquaponics isnt new or revolutionary, it just makes use of natures own methods to grow! You probably have your own reasons why youre looking at aquaponics, but it is something you really need to be familiar with before making the commitment. Do you want your own sustainable, organic, home grown produce Do you want to know where your food comes from and that its the best quality Why waste money on a hydroponic system when you can go the whole way, skip the chemicals, and have home raised fish that are healthier and tastier than store bought. Aquaponics is something that many commercial farmers have known about for years, and some societies have used it for far longer. Tap into their knowledge with this introduction to setting up your system. Well tell you what the right ppm measurements...
