The cow, the hog, the sheep, and the horse, are all, for a variety of purposes, brought under his care and dominion. There is a disease to which the horse, from his state of domestication, is frequently subject. The farriers have called it the grease. It is an in?ammation and swelling in the heel, from which issues matter possessing properties of a very peculiar kind, which seems capable of generating a disease in the human body (after it has undergone the modification which I shall presently speak of), which bears so strong a resemblance to the smallpox that I think it highly probable it may be the source of the disease.
