SMALL DIVISOR PROBLEM IN THE THEORY OF THREE-DIMENSIONAL WATER GRAVITY WAVES (PAPERBACK)

American Mathematical Society, United States, 2009. Paperback. Condition: New. Language: English . Brand New Book. The authors consider doubly-periodic travelling waves at the surface of an infinitely deep perfect fluid, only subjected to gravity g and resulting from the nonlinear interaction of two simply periodic traveling waves making an angle $2[\theta]$ between them. Denoting by $[\mu] = gL/c^2$ the dimensionless bifurcation parameter (L is the wave length along the direction of the travelling wave and c is the velocity of...
