

The Elementary School Curriculum

By Frederick Gordon Bonser

TheClassics.us. Paperback. Book Condition: New. This item is printed on demand. Paperback. 112 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: . . . or distant areas producing them; clothing materials through stores to the cotton fields or sheep ranches, with some general details of their production; woods used in buildings and furnishings through lumberyards to the forests; bricks to the brickyards where they are made; stone to the quarries; and clays used in dishes, metals used in hardware, and fuels for heat and light through local markets to the factories and mines, always using maps, is a means of developing a sense of geographical and occupational interdependence and of the reality and meaning of geographic controls. The more detailed the study of the occupations and projects of the home community and its immediate environment, with the reasons why these activities may be carried on because of resources, climate, and location, the better the basis made for interpreting the meaning of occupations, controls, and relationships of distant localities....
