

Technology and Economic Development: The Dynamics of Local, Regional and National Competitiveness

By Edward J. Malecki

Longman Group. Paperback. Condition: New. UNUSED, LIKE NEW, NOT EX-LIBRARY, 1st Edition, 512 pages. (There has been a growing realization that technology and the management decisions of global business enterprises affect the economies of localities and regions as well as nations. This book brings together existing knowledge about economic development especially at the scale of regions within nations, for if is research at this level that is most valuable for addressing the realities of economic development in the 1990's. Technology is seen as the central ingredient in economic development. It is the process of learning by individuals, and as their cumulative skills increase, by industry, commerce and ultimately nations. It allows for competition between entrepreneurs, for one region to prosper over another and it is the primary influence on commercial management decisions. The economic well-being of people, and communities at all levels, reflects the decisions and policies of organizations in response to technological change. Professor Malecki intends this book to be used as a resource for further study into the dynamics of economic development at local, regional and national scale. He draws information from business studies, economics, development and management studies, geography and science and technology policy to explain...

Reviews

This book will be worth getting. Better then never, though i am quite late in start reading this one. Its been written in an extremely basic way which is only right after i finished reading this book through which actually altered me, alter the way i believe.

-- **Mr. Enrico Lesch**

This publication is very gripping and interesting. We have go through and so i am confident that i am going to planning to read through yet again again in the foreseeable future. You are going to like how the blogger write this ebook.
