Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Studies of Cerebral Function in Learning, Vol. 3: The Motor Areas Since the pyramidal fibres are scattered throughout the caudate nucleus it is impossible to destroy the latter alone. In earlier work [10] I found one case with extensive degeneration of the right caudate nucleus involving few of the pyramidal fibres and leaving the greater part of the stimuable area intact. This animal showed an unusually rapid and complete recovery from the motor disturbances following operation and led to the tentative conclusion that the striate nucleus and stimuable cortex have interchangeable function. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
