Excerpt from A Hand-Book of Diseases of the Skin, and Their Homoeopathic Treatment The design of the present Hand-book is to furnish such a digest of the essentials of practical derma tology, as will be serviceable alike to students and practitioners. In preparing the manuscript I have steadily kept one purpose in view, to make it as thorough and practical as possible. To this end con densation has been more or less necessary, and if at times statements appear too absolute, it must be remembered that conciseness and the limits of the book, prevented any lengthy discussion. The text consists of short general observations on the anatomy, physiology, and pathology of the skin, and on the symptomatology, etiology, diagnosis and classification Of cutaneous diseases; followed by a de tailed description of each individual affection, giving its Clinical history and treatment. To this is added a chart, with diagnostic, therapeutic and dietetic hints. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
