School curriculum is the planned interaction of students with instructional content, materials, resources and processes for evaluating the attainment of educational objectives. It is prescriptive and is based on a more general syllabus which specifies what topics must be understood and to what level to achieve a particular standard. It refers to all courses offered at a school. It also refers to a defined and prescribed course of studies, which students must fulfill in order to pass a certain level of education. Its transaction takes place by the use of literacies and datagogies that are interwoven through the use of digital media and/or texts/books that address the complexities of teaching and learning. Many issues and concerns concerned to school curriculum are discussed in detail in this book. This book will be of great use to the curriculum specialists, textbook writers, teachers and administrators at school stages.
