Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: .hyperimmunization of horse No. 23. Table II.--Potency of serum obtained from horse No. 23. (a) X shows the degree of swelling produced by the virus. IX, slight swelling; 2X, moderate swelling; 3X, large swelling. This experiment shows that 0.55 mil. serum of horse No. 23 has a protective strength of 62 immunizing units; 1 mil., therefore, has a strength of 111 immunizing units. On April 16, 1917, 20 mil. of blood was drawn from the jugular vein. Into each of three 12-ounce guinea pigs 0.55 mil. of the serum was injected. Fifteen hours later they were injected with 125 mg. of dry muscle virus. (Two mg. of this virus would kill a guinea pig net protected with serum.) All three of the guinea pigs survived the test. (Table II.) On April 19, horse No. 23 was bled, 11,350 mil. being drawn from the jugular vein. On April 20 the serum from four horses, Nos. 23, 24, 25, and 26, was mixed and filtered after the addition of perservative. This filtered serum was put up as antibleckleg serum, serial No. Y. In the production of serum from three to eight horses are bled at the same time. The serum from all horses bled at one time is mixed prior to filtration. Each filtration forms a serial. The potency of antibleckleg serum, serial Nos. 45 to 54, has been found to have a protective strength of 70 to 100 units at the present time (September, 1921) as compared...
