The reports by the doctor of the jail and by Lieut. Goodman, who cooperated materially in the work in that institution, are attached hereto as Exhibits Nos. 16 and 17. It will be noted that 92 per cent of the women in this institution had gonorrhoea and 54 per cent had syphilis, 12 per cent of which had active syphilitic lesions which could be diagnosed clinically. Because of the short time the Mayaguez hospital was in operation, it has been impossible to obtain a separate medical report. In San Juan during the months that the hospital has been in existence 218 women have been under observation and treatment. The report of the doctor in charge (Ex. No. 18) states that although 15 women had contagious lesions and 62 were four plus Wassermann positive, at the present time there is not one case of infectious syphilis in the institution. There were in this institution 43 cases of influenza. The disease was comparatively light. There were 7 cases of pneumonia and two deaths therefrom, one a woman of 54 years and the other a girl of 18 years. Several of the pregnant women admitted to this institution were pardoned before childbirth, but in the institution itself it was necessary to take care of two cases of miscarriage and one delivery. In the latter case the mother was pardoned and placed in charge of a woman in San Juan. In all of the hospitals the...
