Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Geology, Vol. 2 of 3 Exceptional attention is given to the evolutions of faunas and ?oras and to their radiations and migrations, while less attention is given to the unrelated features Of the life, however bizarre these may be in themselves. The familiar calling Of the biological roll Under each period is abandoned, and will perhaps be missed; but it has been thought that the mutations of the assemblages of composite life of the great provinces that arose in succession from changes in geographic configuration, are more important as elements in the history of the earth s inhabitants than the classification of life forms as such, par ticularly as such classification is still in a state of transition. The order of treatment of the various forms of life in the several periods is varied according to what is conceived to be their historical impor tance or natural relations.
