CONSTRUCTION: All Marsh and American pumps are fully bronze fitted at regular prices, including solid bronze piston rods and cast bronze removable water cylinder bushings. For handling various chemical solutions, however, this construction is changed to suit the conditions. Either the steam or power driven pumps may be equipped with ball valves when so desired for handling thick or heavy liquids. Marsh and American Pumps are extremely simple in design and the number of wearing parts are reduced to a minimum. Steam valves are of the balanced piston type of the most approved design, and will not allow the pump short-stroke or race. A steam saving of 25 is guaranteed over the duplex type of pump. Power pumps are furnished in both single and duplex types with capacities ranging from 5 to 1500 gallons per minute. Marsh and American steam and power driven air compressors have capacities ranging from 3 to 850 cubic feet per minute.
