## REGULATION OF THE EXCHANGE ACTIVITY OF DBL-FAMILY PROTEINS

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Auto-inhibition, intermolecular interactions and phosphorylation in the regulation of Dbl-family proteins | Dbl-related oncoproteins are guanine nucleotide exchange factors (GEFs) specific for Rho-family GTPases and typically possess tandem Dbl (DH) and pleckstrin homology (PH) domains that act in concert to catalyze exchange. The exchange activities of many Dbl-proteins are regulated by phosphorylation or constitutively activated by truncations preceding their DH domains. However, exact mechanisms of regulation remain poorly understood. The current literature regarding the activation and inhibition of the exchange activity of...

### Reviews

*This publication is definitely worth purchasing. Yes, it is actually engage in, nevertheless an amazing and interesting literature. You can expect to like just how the author write this publication.*

-- **Odie Dicki**

*A whole new e book with a new perspective. I could comprehend almost everything using this written e ebook. I am very happy to inform you that here is the greatest ebook i have read in my very own life and may be he best publication for ever.*

-- **Dee Halvorson**

*This is basically the best ebook we have study right up until now. it absolutely was writtern very properly and useful. You may like how the blogger write this ebook.*

-- **Cecil Zemlak DVM**
