

Photocatalytic Semiconductors : Synthesis, Characterization, and Environmental Applications

By Aracely Hernández-Ramírez

Springer-Verlag Gmbh Nov 2014, 2014. Buch. Condition: Neu. Neuware - This critical volume examines the different methods used for the synthesis of a great number of photocatalysts, including TiO₂, ZnO and other modified semiconductors, as well as characterization techniques used for determining the optical, structural and morphological properties of the semiconducting materials. Additionally, the authors discuss photoelectrochemical methods for determining the light activity of the photocatalytic semiconductors by means of measurement of properties such as band gap energy, flat band potential and kinetics of hole and electron transfer. Photocatalytic Semiconductors: Synthesis, Characterization and Environmental Applications provide an overview of the semiconductor materials from first- to third-generation photocatalysts and their applications in wastewater treatment and water disinfection. The book further presents economic and toxicological aspects in the production and application of photocatalytic materials. 289 pp. Englisch.

Reviews

I just started looking over this ebook. It is actually rally fascinating throug reading period of time. You wont really feel monotony at anytime of your time (that's what catalogues are for about when you request me).

-- **Miss Naomie Kohler PhD**

If you need to adding benefit, a must buy book. It usually does not charge excessive. I realized this ebook from my dad and i suggested this publication to learn.
