Navy sponsored VTOL design studies called project Hummingbird. The rapid development of increasingly powerful powerplants had reached the point where a true VTOL aircraft was in the realm of possibility. The U. S. Navys firsthand experiences with Japans Kamikaze taught them the vulnerability of their great mobile peacekeepers, the carrier. Because of this experience the Navy felt that the only way to protect any naval presence in enemy waters was to equip all ships with a VTOL fighter. This item ships from multiple locations.
