Springer London Ltd, United Kingdom, 2014. Paperback. Condition: New. 2009 ed.. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Mobile robots require the ability to make decisions such as go through the hedges or go around the brick wall. Mobile Robot Navigation with Intelligent Infrared Image Interpretation describes in detail an alternative to GPS navigation: a physics-based adaptive Bayesian pattern classification model that uses a passive thermal infrared imaging system to automatically characterize non-heat generating objects in unstructured outdoor environments for mobile robots. The resulting classification model complements an autonomous robot s situational awareness by providing the ability to classify smaller structures commonly found in the immediate operational environment.
