ELECTRICAL PROPERTIES OF GAS-PHASE SYNTHESIZED NANOPARTICLES

Cuvillier Verlag Sep 2012, 2012. Taschenbuch. Condition: Neu. Neuware - Abstract Zinc oxide (ZnO) doped with aluminum receives increasing attention for being an alternative material for the established but much more expensive indium tin oxide (ITO) due to the fact, that it has comparable electrical and optical properties. The electrical properties of mechanically compacted pellets prepared from nanosized ZnO powders are investigated using impedance spectroscopy. The impedance of the samples is measured in hydrogen and in synthetic air between room temperature...

Reviews

The ideal publication i possibly go through. It is amongst the most awesome publication we have study. I am just easily will get a satisfaction of studying a published publication.

-- **Shanie Cartwright**

An incredibly awesome publication with perfect and lucid reasons. It can be writer in simple phrases and not confusing. I am just delighted to let you know that this is actually the very best publication i actually have study during my very own lifestyle and could be he best publication for actually.
