

Aether and matter; a development of the dynamical relations of the aether to material systems on the basis of the atomic constitution of matter, . earths motion on optical phenomena, being an

By Sir Joseph Larmor

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 120 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: . . . k l and e-k. Thus we may have k and l both unity and e-; so that no further change of scale in space and time is required, but only a diminution of (a, b, c) in the ratio e-k We derive the result, correct to the second order, that if the internal forces of a material system arise wholly from electrodynamic actions between the systems of electrons which constitute the atoms, then an effect of imparting to a steady material system a uniform velocity of translation is to produce a uniform contraction of the system in the direction of the motion, of amount $e - 1 - v^2/c^2$. The electrons will occupy corresponding positions in this contracted system, but the aethereal displacements in the space around them will not correspond: if (g, h) and (a, b, c) are those of the moving system, then the electric and magnetic displacements at corresponding...

Reviews

Absolutely among the finest publication I actually have actually go through. It really is rally fascinating throgh reading time. I am easily could possibly get a pleasure of looking at a composed ebook.

-- Prof. Rick Romaguera

Great eBook and useful one. We have go through and i also am certain that i am going to likely to read through yet again once more in the foreseeable future. Your lifestyle period will likely be transform once you comprehensive looking over this book.
