Questions. 1. Give some striking examples of the divisibility of matter. 2. Give accurate definitions of the English Yard and of the French Metre, illustrating your definitions by reference to the history of each. Write down the equivalent of a Metre in English Inches, of a Litre in English Pints, and of a Kilogramme in English Pounds Avoirdupois. 3. State briefly the advantages of the metric system of weights and measures; and give examples to show its superiority in point of convenience, as compared with the English system. 4. Explain and illustrate the doctrine of the parallelogram of forces. 5. Show how to find the resultant of three given forces acting on a point; and prove that to produce equilibrium their directions must lie in the same plane. (London University, Matriculation, January, 1870). 6. When a horse draws a canal boat is it better to use a long rope or a short rope; and why (Ditto, June, 1872). 7. Show how it is possible for a sailing vessel to be driven by the wind in a direction different from that in which the wind is blowing. (Ditto, June, 1872). 8. A heavy plummet is immersed in a stream, the string being held by a person standing on the bank. The string is found to settle in a sloping position. Show, by means...
