

Sedated by Drugs Schizophrenia and Medication (Paperback)

By Travis Edward Breeding

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. In this book Travis shares what it is like to be heavily sedated by drugs to avoid having psychosis or having psychotic episodes. Travis takes zoloft, busiprone, and zyprexa for autism and schizophrenia. Travis shares with the reader how the medication makes him sleep 15 hours per day and causes him to feel lazy. Travis takes the medication because he knows the trade off is better than psychosis. Travis tries to overcome the tiredness and laziness that the medication causes by working out. Travis loves to go to the YMCA and workout. He loves to go with his support staff to the gym to try and workout and build up some energy. The medicine has really changed who Travis is because it makes him lazy and tired all day long. Travis works hard to overcome the side effects of his medications every day. Travis knows the trade off is better for him. It is better for him to be tired and lazy than to have to hear voices telling him he should hurt himself or harm himself constantly. The...
