WW Norton Co, United States, 2005. Hardback. Condition: New. Language: English . Brand New Book. This introduction is intended as a primer and proceeds from the assumption that many readers are relatively unfamiliar with the field of brain science. Building on this foundation, the authors go on to describe the manner in which memory and affect regulation are neuropsychological processes. The next chapters of the book delve into the concepts of attachment. Specifically, the authors are concerned with how precursors to attachment evolve during the earliest...
