Excerpt: .B shows the pieces rearranged in a rectangle apparently 7×9 , area 63. Paradiromic rings A puzzle of a very different sort is made as follows. Take a strip of paper, say half as wide and twice as long as this page; give one end a half turn and paste it to the other end. The ring thus formed is used in theory of functions to illustrate a surface that has only one face: a line can be drawn on the paper from any point of it to any other point of it, whether the two points were on the same side or on opposite sides of the strip from which the ring was made. The ring is to be slit--cut lengthwise all the way around, making the strip of half the present width. State in advance what will result. Try and see. Now predict...
