

Annals of the Lyceum of Natural History of New York Volume . 8

By Lyceum Of Natural History

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1867 Excerpt: .been observed. The upper surface of certain beds consists of a thin layer or scale of limestone differing from the preceding. Its color is usually light to dark brown. Fracture even. Specific gravity =2.67. It is always very fine-grained and compact, sometimes massive, but often displays on its vertical section, a series of fine horizontal lines of lamination. It is evidently a deposit of an impure carbonate of lime from at least partial solution in water; and as it occurs in layers intervening between the beds, thus marking their stratification, its section (which is always quite distinct in contrast with the white limestones) may be styled the bedding-line. It always adheres to the bed on which it lies, and is partially incorporated with it. A few series of specific gravity determinations have been made upon specimens of the limestone of each bed, selected on the same...

Reviews

This is actually the very best book i actually have read till now. This is for all those who statte that there was not a worth studying. Its been written in an remarkably straightforward way which is merely following i finished reading this publication by which in fact altered me, modify the way i believe.

-- **Mr. Jeramy Leuschke IV**

A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Ms. Teagan Osinski III**
