Excerpt from The Delineation of the Day-Signs in the Aztec Manuscripts Calendar symbols of one sort or another occur on a surprising variety of monuments, both of early and late periods. The most important of these monuments for the study of the workings of the calendar system in detail are certain remarkable picture books or manuscripts, made on folded strips of deerskin, or on paper made of the fibre of the maguey (agave americana). These manuscripts are usually spoken of as codices. Only a few of these native manuscripts survived the introduction of European civilization into America. Those which were pre served were taken to Europe as curiosities, and often preserved through mere luck. The ones still extant have received a great deal of attention since the early part of the last century. All but a few of the originals are still in Europe, and are at the present time considered priceless. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
