It is great and fantastic. It can be written in easy phrases and never hard to understand. You will not really feel monotony at any time of your respective time (that's what catalogues are for concerning if you request me).

The biggest mistake students can make is to try to achieve perfection. Logarithms constitute an intimidating area of MCAT math, and they show up on pH, pI, pOH, pKa, pKb, and decibel questions. But here's the good news: you can skip them all and still get a competitive score. For those few of you who want to conquer the logarithm questions, this guide is for you. Only the top 10 of test-takers, and those who want to be in that top 10, will need this book. If that's you, read this guide carefully and master the logarithms. You'll feel much more confident about the MCAT, and you'll get a great score! By the time you complete this book, you'll be an expert at MCAT math and you'll be ready for an elite score on the Chemical and Physical Foundations of Biological Systems section of the MCAT.
