ANNALS OF THE LOWELL OBSERVATORY VOLUME . 1

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: .and early spring, nothing was visible; as the spring advanced, first the canals and then the spots began to appear; as spring passed into summer, both grew more and more evident; and so on into the full tide of midsummer manifestation. Evidently, then, the change of seasons was a factor in the process. But there is more in the matter than this. The development takes place in a manner to imply that something more immediate than the change in the seasons is concerned in it; immediate not in time, but in relation to the result. A comparison of the behavior of three spots--the Phoenix Lake, Ceraunius (the spot at the junction of the Iris and the Gigas), and the Cyane Fons (a spot where the Steropes, a newly found canal, and the Nilus meet)--will serve to point out what this something is. The Phoenix Lake lies in latitude 17 S., Ceraunius in latitude 12 N., and the Cyane Fons in latitude 28 N. In August of last year, the first of these markings was very conspicuous, the second but moderately so, while the third was barely discernible. By November the Phoenix Lake had become less salient, Ceraunius relatively more so, and the Cyane Fons nearly as evident as Ceraunius had formerly been. In the Martian calendar, the August observation corresponded to our 20th of June, the November one to our 1st of August. All three spots were within the equatorial regions. Now, on the Earth, no...
