Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from A Constructive Method in Histology: Based Upon the Tube Plan of Structure of the Animal Body With Case of Models for Demonstration IN presenting a Constructive Method in Histology the writer is conscious of a somewhat radical departure from the usual plan followed by books upon the subject. It seems, therefore, desirable to explain in some detail the principal reasons for diverging from the methods ordinarily adopted by most authors. Experience in teaching leads one to the conviction that those beginning the study of histology find more or less difficulty in forming a clear conception of the subject and are quite likely to fall into the habit of committing to memory descriptions of structures which they either have not seen or can not see without some experience in gross anatomy and in the use of the microscope.
