Createspace Independent Publishing Platform, United States, 2011. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Is humanity the first creation of intelligent beings? Do similar human-type species exist throughout the cosmos? If so, have those species mastered technologies only to self-destruct in an unfortunate series of events? The Universe is unbelievably enormous, this is undisputed. It is extremely selfish to think we are the only existing intelligent life. Science and religion are on the verge of discovering the truth. Super ancient societies and their archaeological evidence uncovered to this day is a vault of stored information waiting to be unlocked. All we need to do is find the key. Help us uncover the truth by learning about Ancient Earth Mysteries. Evidence suggests: Humanity is not the first nor will be the last creation of intelligent beings. Perhaps millions of years ago a similar species existed which mastered technologies only to face its own demise by an unfortunate series of events. Maybe remnants of super ancient societies are mixed in with the archaeological evidence uncovered to this day. The results could be confusing us further when trying to solve the riddle of our past for this reason. If evolution evolved once, it seems likely evolution has evolved before in other ways as it continues to evolve simultaneously on other worlds.
