

Values of Older Adults Related to Primary and Secondary Prevention: Evidence Synthesis/Technology Assessment Number 84

By U S Department of Heal Human Services, Agency for Healthcare Resea And Quality

Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Prevention implies a future orientation. By engaging in preventive actions, individuals attempt to affect the likelihood of developing a health problem, delaying the development of a health problem, or reducing the severity of the health problem when it develops. An investment in preventive care today is expected to change a person s future health trajectory. At first glance, how expected trajectories impact how various preventive actions are viewed by older adults may seem relatively straightforward. Older persons have shorter life expectancies and hence may view the likelihood of benefit differently from younger people. The differences in perceived possible benefits between the age groups would logically lead to differences in how the age groups value preventive services. Organizations like the U.S. Preventive Services Task Force (USPSTF), charged with making recommendations about preventive services, would likely want to consider the values older people place on various preventive activities as part of the process of formulating recommendations. This project was requested by the USPSTF because clinical preventive services are increasing in importance as the U.S. population ages. However, there are challenges...
